

Advantages of Virtual Multi-Tenancy™ (VMT™)

While ISVs can build multi-tenancy into their code base, the Virtual Multi-Tenancy™ (VMT™) component of our Service Delivery Platform (SDP) provides a system-level solution that is faster, less expensive, and more reliable.

	Wrapped Apps™ Virtual Multi-Tenancy™ (VMT™) Technology Solution	Custom Develop Multi-Tenancy Within Your Application
Pro	<ul style="list-style-type: none"> ■ Full on-demand services capability within weeks ■ Minimal architectural or code changes ■ Simpler software base and maintenance ■ Enhanced security and reliability ■ Retain resources for core innovation ■ Multiple release capability 	None
Con	None	<ul style="list-style-type: none"> ■ Development cost and risk ■ Development schedule ■ Code testing and stability ■ Deployment reliability ■ Perpetual maintenance costs
